

2024 Refrigerant Phasedown Guide

Starting in 2024, **R-410A** production will be reduced to 60% of its historical baseline. Here's what you need to know to keep your HVAC systems up and running, and to navigate the changes.

R-410A Phasedown Timeline*

What You Can Do Now: Prepare Your Property

- Prices of R-410A are expected to rise due to limited availability, and purchasing now can help you avoid spending more in the future.
- As prices of R-410A increase, it's important to keep full tanks stored securely, as they can be a target for theft.
- Reclaiming R-410A from old equipment to reuse in new equipment can help mitigate future costs.

What You Can Do Moving Forward:

- Manufacturers are working to transition away from equipment that utilizes R-410A.
- The refrigerants that will replace R-410A will require enhanced safety protocols, updated equipment, and new installation procedures. HD Supply can help guide you through these changes with everything from education to installation.

Refill & Reclaim

Get Products To Ease Phasedown Now

150110

R-410A Refrigerant, 25 Lb Tank

- Can Be Used With POE Oil

149873

150102

30 Lb. And 50 Lb. Refrigerant Recovery Cylinder

- Liquid Vapor "y" Valve
- 0.75" NPT Port That Accepts 80% Fill Safety Shutoff Switch
- Conforms To DOT-4BA Specifications And ARI Guidelines
