

Serve and Protect with PURELL PEACE OF MIND™

Introducing the PURELL® Vehicle Disinfection Program

The PURELL Vehicle Disinfection Program gives you and your staff the tools and information you need to keep your fleet disinfected and provide peace of mind to your personnel.

This turnkey program lets you leverage the power of America's #1 hand sanitizer brand¹ to showcase your commitment to serving your community with quality and integrity. The program includes PURELL® Hand Sanitizer and Surface Disinfecting Wipes, along with a process guide for employees to follow, for a seamless approach to vehicle disinfection.

PURELL Hand Sanitizer and Surface Disinfecting Wipes help eliminate germs in vehicles, while sending a clear signal to your officers and staff that you're doing everything right to ensure a great experience. From disinfecting surfaces like touchscreens, steering wheels, and other items, to providing PURELL PERSONALS™ Hand Sanitizer Packets for officers and staff, your employees will know that their well-being is important to you.

PURELL® Professional Surface Disinfecting Wipes

- Eliminate 99.9% of bacteria and viruses, including cold & flu, *E.coli*, and human coronavirus in just 30 seconds
- Multi-Surface Compatibility
- No harsh chemicals, no PPE or handwashing required after use

PURELL PERSONALS Advanced Hand Sanitizer Single-Use Packets

- America's #1 instant hand sanitizer now in convenient, portable single-use packaging
- Easy-to-use, one-handed operation
- Each packet provides the perfect amount of PURELL hand sanitizer to kill 99.99 percent of germs

VISIBLE HYGIENE™ Where You Need It Most

Show you care about health and well-being by offering PURELL® products

69% of people expect to see hand sanitizer offered in public places.¹

4X People are 4x more likely to use a brand they trust.²

3X When people were looking for hand sanitizer, PURELL dispensers were 3x more recognizable.³

Providing trusted products sends a clear signal that you prioritize cleanliness and well-being. Identify where visitors and employees need access to our solutions and follow the S.E.T. principles on the next page to meet the moment with VISIBLE HYGIENE.

-  PURELL Surface Disinfectant for common areas and employee spaces
-  PURELL Soap Dispensers for restrooms

Meeting the Moment with VISIBLE HYGIENE™

Now more than ever, people expect visible cues that cleanliness is a priority, and when people see the PURELL® brand, they know they're in a high-quality facility that's prepared for any situation. To meet the moment with VISIBLE HYGIENE, use these quick principles to help place hygiene in the most desired areas:

MAKE IT STAND OUT

Make sure products are noticeable and within people's line of sight.

MAKE IT EASY

Place within arm's length when seated and/or in the natural traffic flow of the environment.

MAKE IT TIMELY

Consider these high-traffic places where hand hygiene is (or should be!) performed most.

- Sunroof and moonroof shade handle

Where

Exterior high-touch points

- All exterior handles
- Fuel lid/gas cap
- Trunk & tailgate button/pull
- Key fob
- Front hood area/lever

***Do not** use PURELL® Professional Surface Disinfecting Wipes on leather, bare metal, or nylon.

To ensure effectiveness, allow surface to stay wet for at least 60 seconds. If repairs are performed on components not listed above, ensure that those surfaces are also disinfected.

Get More from Your Surface Products

PURELL® SURFACE SANITIZERS AND DISINFECTANTS

Every day, we encounter dozens – if not hundreds – of surfaces, and many common germs are transmitted by touch. Breaking the link between hands and surfaces is critical to reducing germs in your facility.

PURELL® Surface Sanitizers and Disinfectants kill 99.9% of germs on a variety of hard and soft surfaces with no harsh chemicals. Formulated to maximize the germ-killing power of alcohol, these formulations are approved for food-contact surfaces and don't require rinsing or Personal Protective Equipment (PPE).

**Fast and
Effective**

Eliminates cold & flu, norovirus, and *E. coli* in 30 seconds, and human coronavirus¹ in just 60 seconds.

Worry Free

The lowest allowable toxicity rating for EPA Design for the Environment (DfE) certified products means there's no need to rinse or wash hand after using.

**Multi-Surface
Performance**

Proven on most hard and soft surfaces, including desks, upholstered furniture, toys, hands-on learning tools, health & fitness equipment, and more.

Make the Right Choice

There are a lot of options when it comes to surface disinfection, but not all surface disinfectants work the same. It's important to know the details about the products you choose. Be aware of:

Kill Times

Some products require several minutes on a surface to be effective.

Safety Warnings

PPE and handwashing are often necessary with harsh chemicals.

Precautionary Statements

If not used properly, some products can damage surfaces or cause injury.

Planning and Implementing a Surface Program

High-touch surfaces are obvious places to start, but it's more important than ever to ensure you're thoroughly disinfecting all the surfaces where germs can hide.

Countertops,
faucets, and sinks

Coffee pots and
other shared items

Food-contact
surfaces

Doorknobs and
drawer handles

Tabletops

Condiment containers
and microwaves

1. Coronavirus Disease 2019 (COVID-19) is caused by SARS-CoV-2. PURELL® Surface Sanitizer and Disinfectant Sprays kill similar viruses and therefore can be used against SARS-CoV-2 when used in accordance with the directions for use against Hepatitis A Virus on hard, non-porous surfaces. Refer to the CDC website at <https://www.cdc.gov/coronavirus/index.html> for additional information.

Cleaning, Sanitizing, Disinfecting

WHAT'S THE DIFFERENCE?

Knowing – and understanding – each can help you reduce germs on surfaces throughout your facility.

You may think that wiping down surfaces with either a diluted solution in a bucket or spray bottle is a quick, easy way to keep these areas germ-free. But there's a big difference between cleaning, sanitizing, and disinfecting. Each has its advantages, but not all methods are created equal. Find out what sets them apart, and how you can get the most out of all three in your facility.

dirt & soils

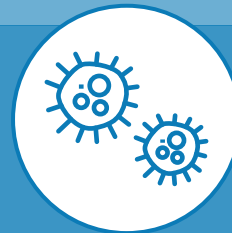

CLEANING

Cleaners – as they're identified by the Environmental Protection Agency (EPA) – are substances or mixture of substances that clean away or remove inanimate material – e.g., dirt, grease, crumbs, etc. – from a surface.

this is where it
gets interesting...

SANITIZING

Surface sanitizers reduce the bacterial population but do not destroy or eliminate all bacteria on surfaces. Instead, they reduce the number of bacteria – and only bacteria – on a surface to a safe level.

bacteria

bacteria,
viruses, & fungi

DISINFECTING

Since they feature the broadest spectrum of activity, surface disinfectants provide the most effectiveness against different kinds of microorganisms – bacteria, fungi, and viruses.

When it comes to eliminating germs on surfaces, understanding the differences between products can help you find the best combination of products.

- ✓ Read and understand what's on the product label.
- ✓ Look for products with broad-spectrum efficacy and fast kill times.
- ✓ Know where the products are being used.
- ✓ Firmly establish cleaning and sanitation practices.
