*The first person on scene
IS the first responder...*

Are YOU Prepared?

**3 to 5
MINUTES**

The Difference between Life and Death

- ▶ A victim who is bleeding can quickly die BEFORE professional emergency responders can even arrive on the scene
- ▶ Serious bleeding accounts for 35% of prehospital deaths from traumatic injuries
- ▶ Life-threatening bleeding warrants immediate intervention
- ▶ Basic bleeding control provided by bystanders can often be the difference between life and death...

*Kit shown:
Class B Trauma &
First Aid Kit-Hardcase
see page 4*

***FACT:** from 2000-2020,
45% of **ALL Active Shooter Incidents**
occurred in **Places of Commerce**

*Death from
Uncontrolled
BLEEDING
can occur in as
little as **3 to 5 Minutes***

Trauma is a national health problem and after a traumatic injury, serious bleeding is responsible for over 35% of prehospital deaths.** Causes of trauma can range from natural disasters, falls, traffic, industrial, and workplace accidents to intentional acts of violence such as shootings, stabbings and bombings. In fact, according to data collected from 2000 to 2020, the U.S. Department of Justice found that the workplace is the most likely location of an active shooter situation.*

Because these traumatic injuries often result in uncontrolled bleeding,

immediate intervention – even before emergency medical services or other first responders can arrive – is critical to avoid potential death.

North American Rescue is leading the way to equip bystanders and initial first responders with the essential medical gear needed to take immediate action in life threatening emergencies. These lifesaving modular aid components are designed for individuals or groups in the workplace, public buildings, and populated public areas to administer immediate bleeding control at the point of wounding.

QuikClot® BLEEDING CONTROL DRESSING

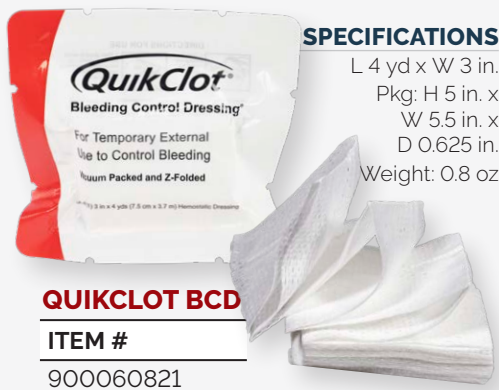

- Advanced hemostatic agent combined with the simplicity of gauze available without medical device authorization (MDA)
- Utilizes the same inorganic component as QuikClot Combat Gauze® used by the US Military to control severe bleeding

NAR WOUND PACKING GAUZE

- Ultra compressed, soft, white 1-ply gauze includes embedded X-Ray detectable line
- Z-fold packaging for controlled application as a complete unit or in a continuous linear feed
- Used as a packing gauze for wounds, as a backing gauze for hemostatic agents, with a compression bandage to control hemorrhage, or for minor wound bandaging

NAR SURVIVAL BLANKET

Aluminized, reflective PET to help retain up to 90% of your body heat
