

# HAVE YOU PLANNED FOR A **HURRICANE?**

Hurricane season is June through November in the U.S. The winds from these storms can exceed 155 mph and the tornadoes, microbursts and storm surges associated with hurricanes often add to the devastation. Do you have a hurricane response plan in place for your business?

## PREPARE

- Review your emergency plan with employees • Store all your vital records offsite • Have essential emergency supplies available
- Obtain additional plywood or other needed window protection • Prior to evacuation, turn off and unplug all electrical equipment

Portable Generators

Batteries

Ropes

Flashlights

Tarps

Weather Radios

Sandbags

Signs

Flood Barriers

## RESPOND

- Have a battery- or crank-operated radio handy for emergency-related updates • Check for gas leaks • Carefully check your electrical system
- Let all electronic equipment dry before reconnecting • Avoid floodwater to prevent injury or illness

Rainwear

Boots

Water Safety

First Aid

Gas Leak Detectors

Portable Lighting

Two-Way Radios

Cots and Beds

Emergency Shelters

Blankets and Towels

Gas and Safety Cans

Disaster Survival Kits

## RECOVER

- To prevent mold growth, dry out buildings and their contents • Restore utilities as soon as possible • To prevent illness, disinfect everything that became wet
- Make your post-storm repairs and rebuilds with preparedness in mind • To protect yourself from hazardous materials during clean-up, wear protective clothing
